

Annual Vital Statistics 2013

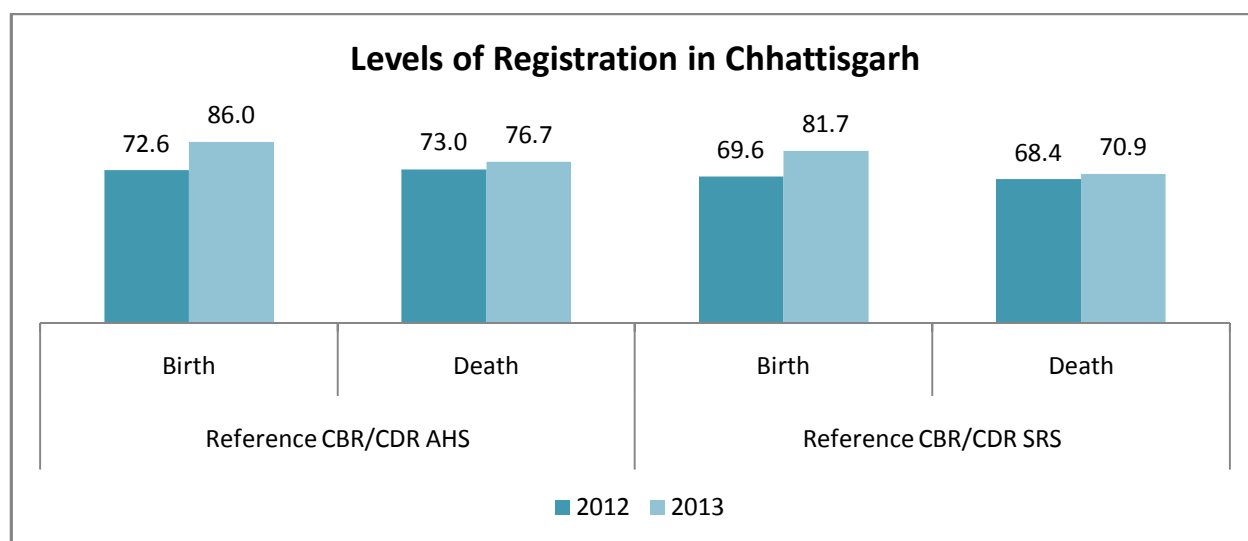

Prepared by
Directorate of Economics and Statistics
Chhattisgarh

Introduction:

Directorate of Economics and Statistics (DES) took an ambitious project to compile vital statistics from individual registration details. Within 8 months DES successfully completed collection and data entry of both 2012 and 2013 registrations. Around 5.92 lakh of 2012 and 6.88 lakh of 2013 individual records were keyed-in the in-house application prepared in CSPro. This method of collection and data entry reduced non-reporting and level of registration of birth and death jumped to 69.6 and 68.4 percent from 55.1 and 59.7 percent respectively. For 2013 also, these efforts yielded some noteworthy improvements in reporting of birth and death registration.

Level of birth registration increased to 81.7 percent which is around 12 percentage point higher than 2012 level. Similarly level of death registration is estimated to be 70.9 percent, a 2.5 percentage point increase over 2012 level. More than 2000 still births are reported in 2013, whereas only 1280 still births were reported in 2012.

Due to time constraint and huge work load only limited data from statistical part was keyed in through an offline in-house application prepared in CSPro. Information related to residence of the mother/deceased person and the part filled by registrar was entered in the application. Following are the details of the information keyed in:

1. Residence of the mother/deceased
 - a. Rural/Urban
 - b. District
 - c. State

Information from “To be filled in by Registrar”

2. Registration unit name
3. Village/Town
4. Registration District
5. Registration Tehsil
6. Registration number
7. Date of Registration
8. Date of Event
9. Sex
 - a. Male
 - b. Female
 - c. Not stated
10. Place of Event
 - a. Home
 - b. Institution
 - c. Other places
 - d. Not Stated

After cleaning, this data was analyzed and 5 tables of birth and death each and 3 tables of stillbirth compiled out of the 53 prescribed tables of CRVS. These are as follows:
